Takeaway **Learnings**

- Online education is only the answer for independent learning systems in the present situation.
- Professions change much faster than disciplines, so students should be more independent learners
- Love for learning will keep the students driven towards gaining knowledge.
- Online education increases global access for students
- Online education can be extended to technologies like interactive radio, TV, community radio.
- Many corporates have been pushing & supporting schools to help them go online.
- Online education content needs to be more engaging
- Making lessons more engaging and more student centric are the pros of the online learning
- Education is merely not restricted to transfer of information, but it is about inclusion, socialization, sharing of knowledge.
- Personalizing Learning, Self-paced learning are some of the unique features of online education.
- Open schooling has a tougher curriculum than traditional schooling system
- Home schools is about learning at home & open schooling is more about liberation of learning in aspects such as what, when, how to learn.
