I don't want AI before I master my sciences; before mathematical freedom, design thinking, effective communication, or understanding sample sizes, units, equations, limits and calculus. I don't want AI before shaping clay, sketching on grids, sanding wood, or immersing myself in Poe, Wilde, Tagore or Frost. I don't want AI before learning how humanity evolved from Pharaohs to Vikings, Greeks to Vedics, Aryans to holocausts and crusades.

Ironically, though I teach AI-related subjects, I've been skeptical about using AI. Its best use, to me, is assisting with boilerplate code, nothing autonomous, always human-guided. I want AI to help me recall, explore, create, and extend ideas responsibly.
